FAST TRACK

EVALUATION

ANALYSIS

DESIGN

Send Us Your Part

Whether you send us an actual sample, or use our Fast Track Quote Request, we will respond to your request promptly. We then track your part through the process.

Preliminary Quote

Once we receive your part, our engineers will evaluate it to determine how we can provide value, and we will issue a preliminary quote.

Material Laboratory

We use a combination of technologies including X-Ray Fluorescence, Fourier Transmission Infrared, and Optical Emissions Spectrometer to pinpoint the exact materials used by the OEM. With so many variations of materials, this step is critical.

Computer Aided Design

Our engineers render parts in SolidWorks using our proprietary two-step process. In addition to understanding how parts function in a machine, we have developed strict protocols used in specifying fit, finish, and tolerance.

5

6

7

8

TESTING

Specialized Testing

We use several types of hardness testers to test metals and plastics. Surface roughness testers provide details for critical surfaces. Force gauges measure spring tension. Specialized gauges help test splines, keyways, and gears and holes.

QUALITY

Quality Control

During the second part of our quality control process, we independently confirm every dimension on the manufacturing drawing to the Original Equipment Manufacturer's part.

INSPECTION

Incoming Inspection

Once parts have been manufactured, they go through the same rigorous inspection and testing process that was followed in quality control.

INVENTORY

Inventory

We maintain an inventory of over 2,000 parts so you don't have to. We ship over 99% of all catalog parts from stock. Let us keep you up and running.

Proven Capabilities

American Holt provides high quality parts fast at a fair price. This is why four out of five of the world's largest food and beverage companies turn to American Holt for our MRO parts expertise. We will analyze your OEM parts purchases to develop an understanding of your consumption. Then we will perform a detailed analysis of your parts usage, identifying which parts are operation critical, difficult to obtain, have long lead times, or are just too expensive. Let us develop a program that is specifically designed for your company's needs.

Partial List of OEM's we make aftermarket parts for:

Alcoa
Allen
Angelus
Benhil
Bete
Bosch
Continental
Crathern
Cryovac
Delavan
Douglas

Evergreen
F. L. Smithe
Fleetwood
Fogg
H & K
Halm
Hayssen
Ilapak
Ishida
Jarvis
KHS

Kliklok
Krones
Markem
Matrix
Norwood
Omori
Pacmac
Procomac
Reiser
Rovema
Sidel

Solbern
Soudronic
TNA
Triangle
Urshel
Vemag
Videojet
W + D
Winpak
Woodman
Yamato

NOTICE: All parts offered by American Holt are manufactured by or for American Holt and not by or for the original equipment manufacturer. American Holt is an independent supplier of quality replacement parts having no affiliation with any original equipment manufacturer.
